To The Kemperbad Lady, Altdorf

Dear Master Infector,

The plans are now in their final stage and almost ready to be released upon these unworthy fools around me. How it pains me to gift them such wonderful lesions when all they will do is complain and seek solace under a surgeon's hand.

I am delighted to receive your latest work of art it is amazing that such a simple object can cause such mayhem. I have thrown the first one you sent over the wall at the goal. I heard shouts as prisoners fought over it so I can only imagine what surprises are "developing" as I write this!

I await your visit with glee.

Infector Lutz
